\*The unique offender population is the measure that counts individual offenders once in a given 12 month reference period regardless of how many times they may have been dealt with by Police.

\*\*The unique victim population is the measure that counts a person/organisation once in a given 12 month reference period for each offence group in which they are recorded as being a victim of an offence, regardless of how many times they may have been victimised.

# Why take action now?

Knowing who is at risk of poor outcomes later in life will help us know where we need to target our efforts and investment.

Recent analysis undertaken by Treasury to understand children who are at risk of poor outcomes and the costs (CYF, benefit and Corrections costs) associated with those outcomes showed that total costs of Pacific children in the cohort before age 36 were estimated as averaging \$80,400.
